SEVA FIRST INNOVATION CHALLENGE 2026 · MAHARASHTRA ZONE · SUBMISSION

SafarSetu

Plan your work around the buses, metro and trains you can actually catch — with calm alerts when things change.

2

The Problem

What real challenge in society, government service or industry are you solving?

What is the problem?

Commuters juggle several apps and learn of delays late. Google Help: no multi-stop directions for public transit. Nobody plans a working day around deadlines.

Who is affected, and where?

Commuters, students, seniors and visitors in Mumbai and Pune. PMPML carries ~10 lakh a day (2025); MSRTC ~50–55 lakh a day statewide (media).

Evidence

Mumbai suburban rail ~68 lakh/day (CR+WR, FY2025-26). PMPML ~60 breakdowns/day (FPJ 2025). TomTom 2025: Pune 33m20s per 10 km. Baseline interviews planned.

Current gaps

Moovit, m-Indicator and Mumbai One give routes and tickets, not a day of timed stops. We complement agency ITMS, not replace it. Alerts rarely say what to do.

~68 lakh

daily Mumbai suburban rail riders, avg. (CR+WR, FY2025-26)

Why it matters

Pune loses ~152 h a year in traffic (TomTom 2025); PMPML ~60 breakdowns a day (FPJ).

3 Our Solution & Innovation

What have you built or designed, how does it work, and what is new about it?

Our solution in brief

A work-and-errands day planner: ordered stops, be-there-by times, must-do flags and a conflict list. Times every bus, metro and train leg, re-plans on delays; alerts in Marathi, Hindi, English.

How it works

1 Input

Stops, be-there-by times, pace, language

2 Process

Timetable routing, on-time odds, live re-plan

3 Output

Leave/board times, calm alerts, shareable trip

What makes it new?

	Existing approach	Our approach
Cost	A-to-B apps, cabs	One plan; ₹0 demo
Speed / time	Guess leave time	Exact leave times
Reach / access	One mode per app	Bus, metro, rail
Ease of use	Single trip only	Many stops, one plan

Key USP

Plans a working day around deadlines across bus, metro and rail; alerts say what to do; citizen gap reports reach authorities. No patent filed.

4

Feasibility & Implementation

How ready is the solution, and what will it take to implement it on the ground?

Current stage (mark ✔ where you are today)

Idea	Proof of Concept	Working Prototype	Field Pilot	Ready to Deploy
		✔		

Technology

TypeScript engine, Next.js web, Expo app. Real rail, PMPML, BEST timetables (community GTFS). Fixed on the way: tourist planner → work/errands; vague alerts.

Estimated cost

Demo ₹0. Pilot est. ₹8.7–13.7k/month for 10,000 users ≈ ₹0.9–1.4 per user (est.; ₹90/$).

Timeline

3 months: baseline interviews.
6 months: agency pilot.
12 months: second city.
(planned)

Partners

To approach (no MoUs yet): Urban Development Dept (GoM), PMPML (CMD), BEST (GM), MMRDA, Maha-Metro, MSInS.

5

Impact & Scalability

What change will your solution create, and how can it grow beyond the first location?

~10 lakh

Beneficiaries reached

addressable: PMPML riders/day; target TBD

TBD

Saving in cost / time

est. only, cab-baseline model; not measured

TBD

Jobs or livelihoods

none claimed; data steward planned

Social impact

Fewer missed connections and rushed trips; Gentle pace and late-walk warnings for seniors; citizen gap reports reach authorities. Impact not yet measured.

Sustainability

Free for commuters; agencies may fund insights and gap ranking. Pilot est. ₹0.9–1.4 per user a month.

Scale-up plan

A city is a data pack (GTFS + places). Next: Nashik, Nagpur, then other states. Needs agency feeds and a data steward.

6

Team/Individual & Support Required

Who is behind the idea, and what help do you need from the Challenge?

Thank you | [Add: contact email / mobile]

Support we are seeking

- [x] Mentorship & technical guidance
- [x] Pilot with a government department
- [x] Funding / grant support
- [ ] Incubation & workspace
- [ ] Testing, certification or IP support

A mentor and an agency pilot take us from working prototype to a one-city field pilot. Work order up to ₹10 lakh, subject to evaluation.
